

Creating your own Mediterranean objects has never been easier

Terracotta effect Colours are ideal for transforming ordinary household objects into timeless and authentic looking terracotta treasures.

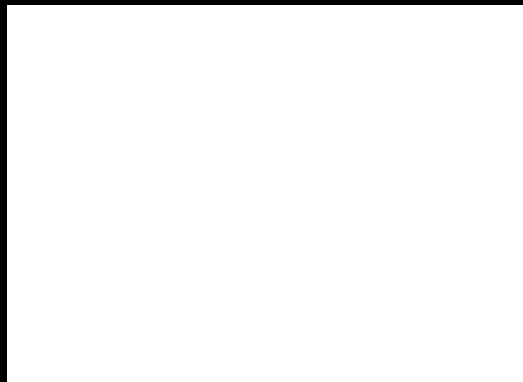

Terracotta effect Colour can be used on wood, stone, pottery, cardboard, plastic and many other surfaces. Terracotta effect Colour can be coated with a brush, speckled or splashed. It can also be applied using a sponge. The choice is yours.

Your local Viva Decor Representative:

■ A plastic pot has been painted with Terracotta Effect Colour.

Step-by-step instructions:

Please make sure that your working surface is clean and dust-free.

1. Use a sponge or a brush for applying a base coat. When dry, apply a second coat of Terracotta effect Colour to create an amazing look.
2. You can achieve a number of unique effects on your painted ornament, just stencil a design or attach rope to create your own timeless master piece.
3. For achieving a typical terracotta effect look: once the colour has dried, lightly sand object with a fine sand paper.

- Colourfast and high covering power
- Special effects
- All colours are intermixable with each other
- Suitable for indoor and outdoor use
